There have been some class changes and premium changes. These changes were made on suggestions by exhibitors.

**Entries are to be received no later than 5:00 pm one (1) week prior to opening day.**

The only exceptions to this policy are as follows:

Motor sports and horse show entries should all be made the day of the event. There will be no advance registration for those events. The entry clerk would strongly prefer that entries be made by mail or online. No entries will be accepted for any category not clearly identified in this premium book. Exhibitors have the sole responsibility for entering their exhibits in the correct class. ## CONCESSIONS

Mail to: Madison County Fair, Charlie Schmidt

PO Box 114, Brookfield, NY 13314

1. The Management reserves the right of cancellation at any time for reason satisfactory to it of all contracts made with all concessionaires.

3. Concessionaires must abide by the laws of State, County and Town including, but not limited to, supplying Vendor Sales Tax identification to the Fair prior to occupying any space on the grounds. 6. The Fair Management will use every precaution to guard against extortion in any form practiced upon the patrons of the fair. A violation of this rule by the concessionaire will cause the forfeiture of contract, money paid, or expulsion from the grounds as the Management may direct.

Animal Health Requirements For  
Admission to New York State and County Fairs  
(Part 351 of NYS Agriculture and Markets Regulations)

### **General Prohibitions and Requirements**

- No person shall bring or have present an animal on the fairgrounds during a fair which is not qualified under NYS regulations.
- No person shall present an interstate or intrastate certificate of veterinary inspection that has been altered by anyone other than the issuing veterinarian or an authorized agent.
- Animals demonstrating clinical signs or other evidence of infectious, contagious or communicable diseases shall not be allowed on the fairgrounds during a fair.
- Representatives of the Commissioner may deny admission to or require removal from the fair premises, or require the segregation of any animal showing signs of or exposed to any infectious, contagious or communicable disease.

Note: The fair board of directors has the authority to reject unworthy or unsightly exhibits for reasons other than infectious, contagious or communicable disease (Part 350.10). The state veterinarian or animal health inspector will bring questionable exhibits to the attention of the fair board.

- All animals presented that originate from a location other than New York shall meet all New York State importation regulations appropriate to the species in addition to the fair animal health requirements.

### **Certificates of Veterinary Inspection (CVI)**

- Cattle, sheep, goats, swine, llamas, deer, monkeys, misc. ruminants, camels and elephants require a valid CVI to enter the fairgrounds.
- The CVI must be issued by an accredited veterinarian.
- All animals must be uniquely identified. All manmade ID must be recorded. Refer to Animal Identification section below for more information.
- Only one species is allowed per certificate.
- The type and duration of certificate required depends on the origin of the livestock.

#### **New York Origin Livestock:**

- A valid intrastate CVI (AI 61) is required.

- Each animal must be individually identified on the CVI.
- The CVI must be issued on or after May 1 of the current year.

AI202 (2/11)

#### Out of State Origin Livestock:

- All animals entering New York State must satisfy import health and test requirements for that species and be accompanied by a valid interstate CVI.
- The interstate CVI is valid for 30 days from the date of issuance. During the fair season (July 1 through Labor Day) valid CVI's can be used multiple times for entrance into fairs. The initial entrance into a fair must be within 30 days of issuance. In order for the CVI to be used for a later fair, it must be dated and initialed by a state official noting the location of the initial fair. A change in health status or eligibility of an animal necessitates the generation of a new CVI.

Questions regarding import requirements should be directed to the Division of Animal Industry at 518-457-3971, or at the division's import/export homepage: [http://www.agmkt.state.ny.us/ai/import\\_export.html](http://www.agmkt.state.ny.us/ai/import_export.html)

#### **Animal Identification**

- Animals requiring a CVI must be uniquely identified. Acceptable forms of unique identification include official eartag, legible registration tattoo or electronic identification (microchip). A sketch or photograph signed and dated by an accredited veterinarian is acceptable identification for llamas and alpacas.

**Note:** A complete written description is sufficient identification for horses entering New York accompanied by a CVI. The description must match the EIA test record. Horse sketches and descriptions should reference color pattern, hair whorls, chestnuts, scars and other markings as necessary to uniquely identify the horse. "Bay, no markings" is not an acceptable description for a CVI or EIA test record.

- It is acceptable for a fair or organization (4H for example) to utilize a unique tag for identification of market class cattle and swine. This tag must include an individual number for each animal and must be approved prior to the fair.
- If electronic ID is utilized as the sole form of identification, the exhibitor is responsible for supplying a working electronic reader. If electronic ID cannot be read entry will be denied.
- Acceptable identification allows positive matching of the animal to all accompanying documents including papers with laboratory test results and vaccination statements.
- Llama and alpaca drawings must positively identify the individual animal.
- A name or a statement of color without additional distinguishing features or man made identification is not acceptable identification.
- USDA approved scrapie identification is required for all sheep and goats.

## **Rabies Vaccination**

- Current rabies vaccination is required for all species for which there is a USDA licensed vaccine available (cattle, horses, sheep, dog, cat, ferret) and that are 105 days or older on the date of admission to the fair.
- An animal is currently vaccinated beginning 14 days following primary (initial) vaccination continuing for the period stated in the manufacturer's instructions.
- Rabies vaccine label instructions allow vaccination as early as 84 days of age. This allows a one week window between 84 and 91 days of age (105 AI202 (2/11) minus 14 days) where vaccine can be administered to meet the 105 day requirement.
- If an animal reaches the minimum age for rabies vaccination during the fair season, the vaccination requirement must be met even if the animal was previously admitted to a fair when too young to vaccinate.
- Note: Individual fairs can require animals for which there is no approved rabies vaccine to be currently vaccinated for rabies. The requirements outlined above would apply. The fair is responsible for notifying exhibitors. The New York State Fair requires rabies vaccination for all livestock species entering the grounds.

### **Acceptable Proof of Rabies Vaccination**

- Acceptable proof of rabies vaccination must include a signed written statement from the attending veterinarian or a valid certificate of veterinary inspection that has the vaccination listed and is signed by the attending veterinarian.
- Acceptable proof of vaccination must include the name of the product used, the date of administration and the duration of immunity if longer than one year.
- If the statement of rabies vaccination is included on an EIA test record, it must be signed separately in addition to the required EIA test record signature.

NOTE: Rabies titers are not acceptable proof of rabies protection and cannot be used to meet entry requirements.

- Acceptable proof of vaccination for dogs is a valid vaccination certificate or a copy of the dog license that contains the rabies vaccination information.

## **BVD-PI Testing**

- All cattle and new world camelids (llamas, alpacas, guanacos and vicunas) exhibited at NY county fairs or the State Fair must be negative to an approved test appropriate to detect Bovine Viral Diarrhea persistent infection (BVD-PI). This is a once in a lifetime test that must be reported on the required certificate of veterinary inspection. The issuing veterinarian is responsible for verifying the validity of the test, the identification of the animal and recording the test date on the CVI. If a

previous test is not verifiable the test must be repeated.

#### Cattle Testing:

- Currently acceptable BVD tests for cattle less than 61 days old:
  - Skin notch Antigen Capture ELISA (ACE) or Immunohistochemistry (IHC)
  - whole blood virus isolation
  - whole blood PCR
- Currently acceptable BVD tests for cattle 61 days of age and older:
  - Skin notch Antigen Capture ELISA (ACE) or Immunohistochemistry (IHC)
  - Serum or milk Antigen Capture ELISA (ACE)
  - Whole blood virus isolation
  - Whole blood, serum or plasma PCR

AI202 (2/11)

Note: The NYS Veterinary Diagnostic Laboratory at Cornell University can conduct PCR testing on pools of up to 10 cattle.

#### Llama, Alpaca, Guanaco, Vicuna Testing

- Currently Acceptable BVD tests:
  - PCR
  - Whole blood virus isolation

Note: The NYS Veterinary Diagnostic Laboratory at Cornell University can pool llama, etc. samples for PCR testing as follows: Animals less than 61 days of age can be tested in pools of 2 animals, whole blood only. Animals 61 days of age and older can be tested in pools of 5 animals using whole blood, serum or plasma.

#### **Cleaning and Disinfection**

- All buildings on the fairgrounds housing animals must be cleaned and disinfected prior to the opening of the fair and between groups of animals when housing is rotated (Section 50.2 of Agriculture and Market regulations).

#### **Kidding and Lambing**

- Due to the concern about the spread of scrapie, any sheep or goats that are exhibited at a county fair that have recently given birth or have a vaginal discharge, will be ordered removed along with their offspring.
- The causative agent for scrapie may be present in high concentration in fluids associated with birth and the risk of transmission is considered highest at that time.

#### **Commingling of Sheep and Cattle**

- Due to the potential spread of malignant catarrhal fever from sheep to cattle, it is recommended that cattle be kept separate from sheep.

#### **Commingling of Swine and Poultry**

- Due to the potential spread of influenza viruses it is recommended that swine and poultry be housed in separate locations.

## Isolation on Returning Home

- The owner or custodian shall keep show animals biologically separate from the herd or flock for a period of at least two weeks after returning to the premises of origin.
